Summary

MCA graduate with a strong foundation in **Web Development** and **Full-Stack Development**. I have practical experience in building responsive websites using HTML, CSS, and JavaScript, with a strong interest in **MERN Stack** development and problem-solving. Adaptable to roles such as Frontend Development, I am eager to expand my expertise by learning new tools and technologies. With strong collaboration skills, a growth mindset, and a dedication to delivering quality results, I am motivated to contribute effectively to innovative IT projects.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python

Databases: MySQL, MongoDB

Frontend: HTML, CSS, React

Tools: Git, GitHub, VsCode

Backend: Node.js, Express.js

Other Technologies: Capacitor, REST APIs,Gemini API

EDUCATION

- **Bachelor of Science (B.Sc.) CGPA:7.72**

Smt. Kasturbai Walchand College, Sangli [2021-24] in **Shivaji University, Kolhapur**

- **Master of Computer Applications (MCA)**

Suryadatta Institute of Management & Mass Communication, Pune [2024-26] in **SPPU University, Pune**

PROJECTS

- **SpectraSynth CRM - Full-stack web application**

Backend Tech: Express, Sequelize, MySQL, Puppeteer, @google/generative-ai, IMAP/mailparser, pdfkit

Frontend Tech: React, Vite, Bootstrap, Axios, React Router, charting libraries

Features: Automated CRM system with AI email parsing, supplier price scraping, PDF quotation generation, and MySQL-backed React + Node.js workflow.Supports inquiry, quotation, order, product management, dashboards, role-based access, and chemical/pharma sales automation.

- **Pratik AI Assistant – Full-Stack AI Application**

Tech Stack: Node.js, Express.js, JavaScript, Vite, Capacitor, Java, Gemini API, OpenAI API

- Developed an AI-powered personal assistant for web and Android platforms.
- Integrated Gemini, OpenAI, and ElevenLabs APIs for intelligent chat and voice interaction.
- Built Android native plugins using Java for calling, contacts, and microphone access.

- **Weather Application | React.js | Material UI**

Purpose: A simple weather app that lets users search any city and view live weather information.

Features: City search, current temperature, humidity, feels-like temperature, min/max temperature, weather condition, and a 5-day forecast.

API Used: OpenWeather API for current weather and forecast data.

- **Building Construction Material Management System**

Desktop Application | C#, .NET Framework, SQL Server, MS Access

A desktop-based application designed to streamline the management of construction materials at project sites.

Features: Monitor inventory, automate stock records, and reduce material wastage effectively.

Internship

Intern – Junior Web Developer | Darshand Digital Solution, Pune
Feb 2026 – May 2026

- Contributed to full-stack web development projects using React.js, Bootstrap, CSS, Node.js, and MySQL
- Assisted in developing and maintaining the Spectra CRM application, including feature implementation and bug fixing.
- Participated in software development, testing, documentation, and code review activities.
- Optimized application performance and collaborated with team members to resolve technical issues.
- Worked in an Agile team environment and gained hands-on experience with real-world development workflow
- Demonstrated strong problem-solving, teamwork, and communication skills while meeting project deadlines.

CERTIFICATION

- **Full StackJava (FUEL):** Completed hands-on training in Full Stack Web Development using Java technologies in Friends Union for Energising Lives, Pune
- **LinkedInLearning:**
 - Java Essential Training
 - Python Essential Training
- **MagicBus:** Certificate of Participation in Orientation on AI and Life and Employability Skills, focusing on essential skills.

CORE COMPETENCIES

- Full-Stack Web Development
- MERN Stack Development
- REST API Development & Integration
- Database Management (MySQL, MongoDB)
- Responsive Web Design
- Git & GitHub Version Control
- Problem Solving & Debugging
- Team Collaboration
